# WHAT IS ESG AND NET-ZERO ARCHITECTURE?

/ DR GERARDINE MCLOUGHLIN, ARCHITECT, URBANIST AND URBAN RESEARCHER

AS DEMAND RAMPES UP FOR ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG) CERTIFICATION AND NET-ZERO ARCHITECTURE WHAT MUST PRACTICES DO TO DESIGN

## BUILDINGS THAT LAST, BUT ALSO POSITIVELY CONTRIBUTE TO DECARBONISATION?

Why it matters: Paris Agreement, COP26 and Australia's commitments There's a revolution going on in the built environment that is sweeping across the asset fund investment and management world, and this means a radical change for architects. "In this pivotal era, architects must embrace good passive design and champion sustainability from the drawing board to create a brighter, greener future," says David Carabott, Founding Director at CHT Architects for aged care developments. Australia is in catch-up mode on the climate
